

Wael El-Dabah

Teaching Assistant Candidate | Cybersecurity & Software Engineering

Cairo, Egypt | +201095948265 | wael.eldabah1@gmail.com | linkedin.com/in/wael-el-dabah

ACADEMIC PROFILE

Software Engineering graduate with a Very Good overall grade and hands-on experience in cybersecurity, programming instruction, and applied security projects. Experienced in delivering technical training, mentoring learners, and explaining programming and cybersecurity concepts through practical exercises. Strong interest in academic teaching and research, with a clear goal of pursuing postgraduate studies in Cybersecurity and developing a long-term academic and research career. Brings practical industry exposure in penetration testing, secure code review, and AI-driven network security.

RESEARCH & ACADEMIC INTERESTS

Cybersecurity & Network Security • Penetration Testing • Threat Detection & Threat Intelligence • AI/ML for Cybersecurity • Secure Software Engineering • Applied Security Research

TEACHING & MENTORING EXPERIENCE

Cyber Security Instructor — Udacity Dec 2024 – Mar 2025

- Delivered cybersecurity training sessions and mentored learners, evaluating performance and providing constructive feedback.
- Explained technical security concepts in an accessible, practical manner and supported learners during hands-on activities.

Programming Instructor — Almentor Sep 2024 – Dec 2024

- Delivered Python and programming instruction through hands-on coding, debugging, and problem-solving sessions.
- Supported learners in understanding programming concepts and applying them through practical exercises.

PROFESSIONAL EXPERIENCE

Cyber Security Intern — IGRC Square Jul 2025 – Dec 2025

- Performed web application and network penetration testing, secure code reviews, and vulnerability identification under senior supervision.
- Authored technical findings and remediation reports and supported client communications alongside senior consultants.

SELECTED PROJECT

EyeGuard – AI-Powered Network Detection & Response (NDR) Platform Digitopia Cybersecurity Competition

- Designed and developed a passive AI/ML-driven NDR platform using Isolation Forest, LightGBM, Random Forest, and XGBoost for attack detection and classification.
- Engineered real-time packet capture with Python/Scapy and integrated threat-intelligence sources including VirusTotal, Shodan, and AbuseIPDB.
- Applied cybersecurity, machine learning, networking, and software engineering concepts in an end-to-end practical research-oriented project.

EDUCATION

B.Sc. in Software Engineering — Assiut National University, Faculty of Computers and AI 2022 – 2026

- Overall Grade: Very Good

CERTIFICATIONS

eJPTv2 • CEH – Certified Ethical Hacker (NTI) • HCIA-Security (NTI)

ACHIEVEMENTS & ACTIVITIES

- Ranked 4th Nationwide in the Digitopia Cybersecurity Competition.
- Awarded Best Team Leader in the Digital Egypt Pioneers Initiative (DEPI); honored by Egypt's Minister of Communications.
- Delivered cybersecurity fundamentals and penetration testing sessions through Google Developer Student Club.

TECHNICAL SKILLS

Cybersecurity: Web & Network Penetration Testing, Vulnerability Assessment, Exploitation, Secure Code Review

Programming: Python, C#, C/C++, Java

Platforms & Tools: Windows, Linux, Git, GitHub, Python/Scapy

Professional: Teaching & Mentoring, Leadership, Communication, Critical Thinking, Self-Learning

LANGUAGES

Arabic (Native) • English (B2–C1)
